GENDER AND CLIMATE CHANGE
LATIN AMERICA

Key Findings

4. Latin American countries consider women as agents of change and important decision makers in the fight against climate change.

10. Latin American countries integrate a cross-cutting gender approach in their NDCs and consider women as a group vulnerable to climate change.

Most countries in Latin America acknowledge the relevance of gender in their regulatory frameworks related to climate change.

Mexico
Women and girls include crucial insights and gender perspectives to build effective and inclusive strategies in the fight against climate change.

Guatemala
The most affected population groups are indigenous peoples, disabled persons, and children, who are key partners in any response and adaptation to climate change.

Costa Rica
Costa Rica’s transformative approach to gender equality and climate change is a model to be followed, promoting gender equality and women’s empowerment.

Honduras
The participation of women and children in decision-making processes is crucial for the success of climate change policies.

Panama
Mechanisms of public hearings were established for the participation of different sectors, resulting in gender equality and inclusion of different groups.

Venezuela
Brazil
The Government of Brazil is committed to mainstreaming gender and climate change, promoting gender equality measures.

Paraguay
Paraguay is a competitive country, with a strong role of women and gender equality in decision-making processes.

Uruguay
Uruguay is a role model for other countries, with a strong role of women in decision-making processes.
